

Tempest

Materials

Body: The Tempest is made from either stainless steel (grade 304), pickled and electro-polished or from galvanised steel

The litter container, which pivots down for emptying, is retained by a snap-lock mechanism using a tri-head bolt

Options

Available in stainless steel (grade 316) to order

Options available:

- Pedestal
- Wall mounted
- Post mounted

May be supplied with an ashtray fitted within the lid

Installation

Pedestal: To have the lower 600mm of the frame buried in the ground

Wall mounting: A pair of brackets with 2 x 12mm holes fix the bin to the wall

Post mounting: A pair of stainless steel bands are provided (special clamping tool required)

Capacity

47 litres

Weight

Pedestal: 21kg

Wall and post mounted: 17kg
