

Juno Dome

Materials

Body: Made entirely from stainless steel (grade 304)

Liner: Stainless steel (grade 304), retained by snap-lock mechanism using a tri-head bolt. The body of the bin pivots to facilitate the removal of the liner

Options

The metal parts may be painted in any standard RAL colour. May be supplied clad with vertically mounted wooden slats made from untreated Kambala. Note that untreated wood will become pale silver/grey over time

The slats may be treated with a light brown wood stain

May be supplied with a flange plate

Installation

The lower 500mm of the support frame is buried in the ground

Capacity

30 litres

Weight

31kg
