

# Auto Stop System

This smart solution for car parks is designed to limit the available parking area to protect the column or immediate area beyond and, because it comes with a printable front panel, it can also be customised to specific requirements

**Materials**

Extruded anodised aluminium ramp with cast aluminium end caps and removable cover panel which may include wording or images if desired, (e.g. Reserved, Disabled Parking) or advertising, seasonal messages, vehicle registration numbers etc

Lettering supplied as Helvetica Condensed Black as standard

Applications include surface and underground car parks, protecting lighting columns, buildings, walls and monuments

**Options**

The Auto Stop may be painted any standard RAL colour

The wording or images on the cover panel may be in any standard font up to 96mm and colour and may be applied with self-adhesive film or printed

Alternative lengths can be made to order

**Installation**

To be bolted to the ground (fixing bolts supplied)

**Weight**

15kg

**Product Code**
