### **Garda Product Codes**

- Example: Garda Stainless Steel fully welded comfort 4K continuous root stanchion mounted 0.74KN glass infill emergency
- Garda-C-4K-CON-SS-0-R-0.74-GL-E
- Please note that module size is dependent on achievable spacings between bracket / stanchion centres so may change after the design process
- Please see full brochure for module outputs
- Loadings are requested but not confirmed as being achievable until full scheme drawings have been received and spacings / mat size calculated accordingly
- Number of power supplies are determined by load, electrical specification and available power supply locations
- Standard bracket's and stanchions are tube; any other design will need to be instructed (see below)
- All standard RAL colours are available and bespoke colours on request
- See full Garda brochure for more information

Standard Round wall bracket Alternative Square wall bracket
